"ICE - Where Education Meets Opportunity"

Cooperative Education at Antalya Bilim University is an international career-start model that allows undergraduate students—who have successfully completed their core courses—to voluntarily participate.

The program enables students to transform their academic and theoretical knowledge into practical experience through full-time, long-term placements lasting between 28 and 50 weeks.

It aims to help students gain real-world work experience before graduation, develop professional skills, and transition more effectively into professional life.

The ICE Approach: Purpose, Practice, and Impact

Experiential Learning at Antalya Bilim University

At Antalya Bilim University, we believe that learning goes beyond the classroom. Our International Cooperative Education (ICE) model empowers students to engage directly with the professional world, applying what they've learned to real-life challenges.

Top Talent, Real Impact

ICE helps shape future professionals who are not only academically strong but also equipped with hands-on experience. Our students bring energy, ideas, and ambition to every organization they join.

Full Credits – Full Experience – Sustainable Value

Students earn full academic credit while gaining meaningful experience. Employers benefit from fresh perspectives and a motivated talent pipeline. Together, we build long-term value through real-world collaboration.

Benefits for Employers

Cost-Effective Support: Lower labor costs compared to full-time hires, with strong ROI.

Reduced Training Time: ICE students are prepared for full-time roles, making the transition seamless.

Long-Term Value: Students add immediate value and are well-positioned to become key long-term assets.

Strong Talent Pipeline: Identify high-potential talent early, evaluate fit with minimal risk, and strategically develop future leaders for long-term success.

Tackle Workforce Gaps: Fill short-term staffing needs fast. Keep projects moving without overloading your team.

Boost Innovation & Energy: Fresh ideas, new skills, and eager minds—ICE students bring a spark that drives growth.

Motivated and Accountable Talent: ICE students are driven to succeed and deliver high-quality work tied to their academic goals.

Benefits for students

70% of cooperative education students get job offers before graduation!

Real-world experience: Gain practical knowledge in your chosen field.

Industry connections: Network with professionals and build valuable contacts.

Earn while you learn: Most placements offer competitive salaries, based on the industry and employer.

Career readiness: Build confidence and develop essential job search and career planning skills.

Higher employability: ICE graduates can secure relevant jobs faster and more easily.

ICE Across Faculties

"Where Education Meets Industry—A Partnership for the Future"

The ICE Program at Antalya Bilim University is built on a simple but powerful idea: when education and industry collaborate, everyone wins.

For students, ICE offers more than just work experience—it provides paid, credit-earning placements that accelerate career readiness, build confidence, and create lasting professional networks.

For employers, it's a low-risk, high-reward opportunity to access young talent equipped with fresh perspectives, up-to-date knowledge, and a strong motivation to perform. By engaging with ICE, companies not only fill current needs but also shape the future workforce—helping drive innovation, sustainability, and long-term value.
